# Health Precautions for a **Safe Flight**

## Your health matters ….

For a more convenient travel experience, please follow the following advices that will keep you safe in every step.

### Before flight

- You can use our digital services to book a flight with EGYPTAIR.
- Call our contact center **1717**, use our website **egyptair.com** or our mobile apps **24/7**.
- You can check-in and print your bag-tag through egyptair.com or EGYPTAIR mobile apps.

### Moving to Airport

- Every passenger is allowed to a maximum of **100 ml** of Alcohol- based disinfection material or hand sanitizer (must be well packed).
- Wear your facemask from leaving the house till arriving to your destination.
- If you feel unwell, please consult your physician prior to flight.
- Please arrive at airport **4.5** hours prior to international flights and **2.5** hours prior to domestic flights.

### Check-in & health screening

- Use the self check-in kiosks at the airport to ask for the assistance of EGYPTAIR airport teams.
- Please keep safe distance between yourself and other passengers and follow the instruction signs .
- You may be asked to open your passports and take off your facemask to complete the check-in procedures.
- Airports are equipped with temperature testing devices.
- Hand sanitizer dispensers are available at the airport for your personal use.
- Carry – on baggage to be allowed only for laptops and babies' belongings.

### Visiting our Lounges

- At lounges, we have kept sufficient spaces between customers. All lounges are provided with sanitization material to keep your hands clean at all times.

### Onboard

- Please be present at the boarding gates sufficient time prior to your flight.
- Our cabin crew are keen on providing seamless health measures to guarantee your safety, and they will wear the personal protective equipment that keep them safe.
- All meals will be packed and we apologize if we couldn't serve a number of food, beverage and inflight items during flights.
- All EGYPTAIR aircraft are equipped with (HEPA) system for air filtration with efficiency to capture 99% of viruses, bacteria & microbes.
- Our fleet is routinely disinfected for all incoming flights.
- Facemask should be used throughout the whole flight.

### Arrival

- Please keep safe distances during disembarkation.
- Please keep wearing your facemask while leaving the airport.
- Health declaration or arrival medical form maybe required before landing by the destination regulatory authorities.
